

CAUTION

Wood Working Band Saw

- Keep work area clean.
- Before you begin:
 - Inspect workpiece for nails, screws, knots, etc.
 - Replace broken, dull, cracked, or fouled saw blades.
 - Adjust blade tension.
 - Be sure filler plate/blade gap is no more than 1/8”.
 - Be sure exposed blade above material is no more than 3/8”.
- Use correct saw blade for material being cut.

Note: Immediately report all machinery malfunctions to the supervisor.
